

A background image showing three business professionals in a meeting. A man in a suit is shaking hands with a woman in a white blazer, while another man in a white shirt sits at a computer workstation in the background.

SMART WIFI AUTOGATE SWITCH

The WIFI AUTOGATE SWITCH uses your existing home Wi-Fi network to provide wireless control of your autogate system from anywhere in the world. No subscription or hub is required: simply install the WIFI AUTOGATE SWITCH and start controlling your autogate system from your phone or tablet. Using the free WIFI Smart Control app, you can switch your autogate on and off. The WIFI AUTOGATE SWITCH also functions like a normal switch: simply press the switch to toggle your autogate on or off.

WIFI SMART CONTROL

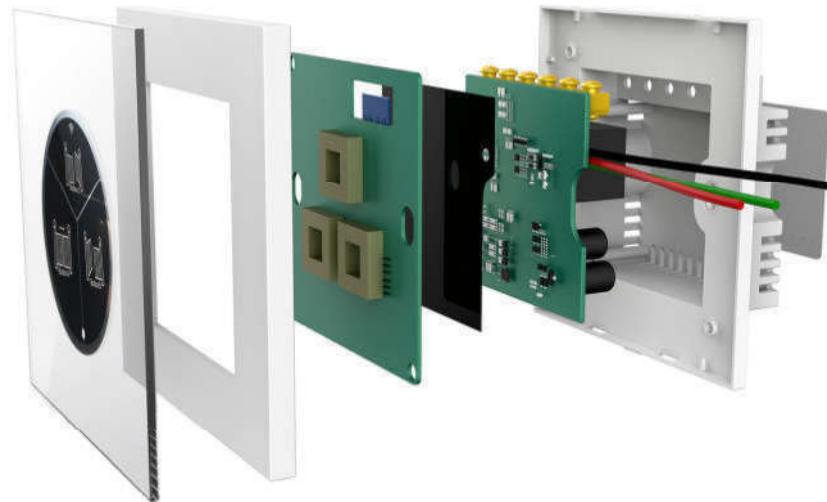

LT3X WiFi Autogate Switch

It can replace all access control, remote control and wall switch.
With it, you don't have to roll down the window to open the door.
With it, you don't have to get out of the car and open the door manually.
With it, you don't have to worry about taking a remote controller at any moment.
